DOMAINS for GeekVishwa Hackathon:

<u>Choose ANY of the 8 exciting domains for your hackathon project.</u> In your chosen domain, you have the creative freedom to <u>define your own unique problem statement.</u> Let your imagination run wild and explore the challenges and solutions that inspire you the most.

In simple words, select any domain you like, form an idea, and implement it into reality.

Data & AI	Dive into the world of data and artificial intelligence, where you can learn how to make sense of vast amounts of information and create intelligent solutions.
Gaming & Entertainment	Build fun experiences and explore the intersection of technology and leisure. This includes 2D/3D games, AR/VR, movies/tv shows softwares, etc.
Fintech	Delve into the dynamic world of fintech, where you'll craft innovative solutions for managing money, investing, and revolutionising financial services.
Blockchain & Web3	Explore the decentralised world of blockchain and Web3. Create solutions like decentralised finance (DeFi) apps, NFT platforms, or blockchain-based voting systems.
Healthtech	You can build applications that help patients manage their health, or tools that assist healthcare providers in diagnosing and treating patients.
Environment & Sustainability	Build software solutions that promote sustainability and protect the environment. The aim can be to reduce waste, conserve energy, monitor wildlife, and prevent natural disasters.
EdTech	Shape the future of education with edtech, where you can create digital tools and resources that enhance learning experiences for students and educators.
Cybersecurity	Develop solutions such as intrusion detection systems, secure authentication methods, or threat intelligence platforms.
